

Guidance for completing this document can be found at the end.

Each identified risk is scored and classified as follows:

Likelihood (L)
1 = Very Unlikely
2 = Unlikely
3 = Possible
4 = Likely
5 = Very Likely

Severity (S)
1 = Insignificant
2 = Minor
3 = Moderate
4 = Major
5 = Catastrophic

Relative Risk (L x S)	Level of Risk
1-6	Low Risk
7-12	Medium Low Risk
13-19	Medium High Risk
20-25	High Risk

Risk Description: based on Working safely during COVID-19 in labs and research facilities And https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19/offices-and-contact-centres		Responsible Line Manager/course tutor/responsible person			Gavin Taylor				
Activity Applicable Area / Room Number	Risk Identification: what do I need to consider when returning to site?	L	S	RISK SCORE	CONTROL MEASURES	L	S	RISK SCORE	Further Comments
	<p>1.1 Managing Risk:</p> <p>i. No handwashing station?</p> <p>ii. Activity takes a long time. Describe or list activities in Further Comments section</p> <p>iii. Can social Distancing measures be implemented?</p> <p>iv. Are more than a small group of persons required for the workload?</p> <p>v. Are any persons in your team especially vulnerable to Covid -19 infection?</p>	5	4	20	<p>i. Locate the nearest station and encourage staff to increase the frequency of handwashing and surface cleaning.</p> <p>ii. Encourage individuals to keep activity time as short as possible Social distancing guidance.</p> <p>iii. Individuals are to use back-to-back or side-to-side working (rather than face-to-face) whenever possible Social distancing guidance. Extra Information: Click Here.</p> <p>iv. Providing screens or barriers to separate people from each other if required (Requests for screens will be triaged by the E&F department – contact helpdesk for further enquires). Social distancing guidance Extra Information: Click Here.</p> <p>v. Should not currently return to site - see University Covid19 guidance, Key Principles document, HR Guidance, updated Government advice Extra Information: Click Here.</p>	3	4	12	<p>i. Handwashing at H2 Toilets. Hand sanitiser to be available in room</p> <p>ii. Room use may be between 15 and 30 minutes</p> <p>iii. Distancing measures cannot be implemented due to room size. Room will be restricted to 1 family group at a time.</p> <p>iv. N/A</p> <p>v. Room is on-site amenity. Decision for individuals to attend site taken elsewhere</p>

	5.2 Keeping the workplace clean: i. There is extra requirement for the cleaning regime in your area? Please explain why in the further comments section e.g. area is identified as high traffic ii. The required cleaning process for expensive equipment that cannot be washed down has not been determined and cannot be performed? Please describe why in further comments section iii. There is no local process in place for the Clearing of workspaces and removing	4	4	16	i. Staff team members should carry this out. Should be in Risk assessment/stated in Local rules/SOPs. ii. Cleaning guidance for laboratories Covid-19 available on H&S website (Guidance can be used for other areas) Extra Information: Click Here iii. Determine in advance the required cleaning process for expensive equipment that cannot be washed down, designing protection around machines and equipment. Please consult	3	4	12	The Welfare Room is unstaffed. Enhanced regular cleaning must be agreed with Estates and Facilities.

	waste and belongings from the work area at the end of a session? iv. There is no local process for the identification and reporting of equipment or areas used by an infected person or suspected case?				with manufacturers and /or technical support staff. See guidance iv. Write and communicate with team a process for Clearing workspaces and removing waste and belongings from the work area at the end of a shift. v. Anyone who has symptoms whilst on site must transfer to isolation room. All infected persons or suspected cases must be reported to their line manager and HR. If you are cleaning after a known or suspected case of COVID-19 you should refer to specific guidance .				
Activity Applicable Area / Room Number	Risk Identification: <i>what do I need to consider when returning to site??</i>	L	S	RISK SCORE	CONTROL MEASURES	L	S	RISK SCORE	Further Comments
	5.3 Hygiene – handwashing, sanitation facilities and toilets: i. Individuals unable to perform regular handwashing? Explain why in further comments ii. Handtowels or hand drier unavailable iii. No local access to working toilets	1	4	4	i. Use nearest communal facilities Extra Information: Click Here. ii. Please contact the Estates helpdesk (estates@sgul.ac.uk) to advise that replenishment of soap or towels is required. Extra Information: Click Here iii. Identify nearest toilet facilities. Contact Estates Helpdesk (estates@sgul.ac.uk). Estates &Facilities will set clear use and cleaning guidance for toilets to ensure they are kept clean and social distancing is achieved as much as possible.	1	4	4	Nearest facilities toilets on H2

Activity Applicable Area / Room Number	Risk Identification: <i>what do I need to consider when returning to site?</i>	L	S	RISK SCORE	CONTROL MEASURES	L	S	RISK SCORE	Further Comments
	5.4 Changing rooms and showers: i. There is staff requirement to make use of these facilities?	n/a	n/a	n/a	i. Where shower and changing facilities are required, Line managers should ensure individuals are aware of the institutional guidance for use and cleaning guidance for showers, lockers and changing rooms to ensure they are kept clean and clear of personal items and that social distancing is achieved as much as possible. There will be enhanced cleaning of all facilities regularly during the day and at the end of the day.	n/a	n/a	n/a	n/a

Phase 1 Covid 19 Guidance on how to complete this risk assessment

This risk assessment follows the government guidelines and framework for 'Working safely during COVID-19 in labs and research facilities' and <https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19/offices-and-contact-centres>

The key purpose of this assessment is to reduce the risk of Covid19 transmission. You will need to consider laboratories, offices and breakout areas in your assessment, incorporate social distancing and cleaning measures. This may require limiting numbers of people in the area and, if a shared facility, may need discussion with other researchers/individuals.

As laboratories/work areas have been closed for some time, you should carry out a laboratory/area inspection to ensure contents are safe and secure. These should be completed on a regular (eg. 6 monthly basis)

You will need to amend your local rules/SOP for your laboratories/areas to reflect changes in the light of new risk assessment, social distancing and cleaning requirements.

This risk assessment needs to be completed by the Line Manager/course tutor/responsible person before returning to work. For laboratory users, you will also need to complete Local rules for your laboratory/ies using the new amended template and a laboratory self-inspection before work can commence. **These documents must be submitted to the Research Institute Manager (RIM) and receipt confirmed before commencing any work.** For other areas, you should complete an inspection of your areas (Office Inspection check list can be found here <https://www.sgul.ac.uk/about/our-professional-services/safety-health-and-environment/a-z#o>) and consider producing Local Rules/SOPs for individuals to follow.

Note:

Section 1 - addresses general risks highlighted by [government document](#).

If vulnerable individuals need to return to site, an individual risk assessment evaluating fitness to return should be completed and discussed with their Line Manager. Further advice should be obtained from the SHE office (health@sgul.ac.uk) and HR.

To complete this risk assessment:

- For each activity score the likelihood and severity of risk before and after control measures. Use the return key to align the score with the risk consideration. The likelihood x severity will give you the risk score.
- Likelihood -this is the likelihood of the risk (transmitting infection/contracting infection for the activity. Currently for example, if social distancing measures are adhered to and cleaning measures are in place the likelihood will be low.
- Severity – this is the consequence of the risk to the health of individuals. (For some people the severity associated with contracting Covid-19 will be higher than others. Therefore, the severity is likely to be high)
- Risks can be marked as N/A if they do not apply to your laboratory or area.
- Control measures can be added or deleted as appropriate and should be 'best fit' for the situation
- Add additional comments that are necessary to action control measures in your area,
- Post control measure, the scoring for likelihood should fall, but severity stays the same resulting in a reduced risk score.
- Click on the extra information content boxes. These are drop down text boxes that are for reading purpose only. Do not select within this box.
- For researchers, date the form and submit to your Research Institute Manager, for others please submit to your local H&S committee. Confirm receipt before commencing any work.
- Ensure it is communicated to all staff and students in your team (e.g. e.mail) and (if necessary) to other individuals that share your laboratories/offices /work areas before commencing any work.

Once you have completed these tasks consider designating your area 'Covid secure'.

This does not suggest that there is no risk, it just states that you feel you can follow the Government advised social distancing once these control measures are put in place.

<https://assets.publishing.service.gov.uk/media/5eb97021d3bf7f5d43765cbf/staying-covid-19-secure-accessible.pdf>

Trouble shooting:

1. Selected a line in the extra information box that now displays in the control measures – **click the ‘undo’ button and it should return to display the text ‘extra information’.**
 - Useful
