

St George's, University of London
Scheme of Assessment for BSc (Hons) Healthcare Science Year 2

Addendum for 2020-21 Assessments (Unforeseen Circumstances Regulations)

Trailing Clinical Training 1 module (CT1):

The following Year 1 summative assessment units could not be completed within the 2019-20 academic year due to the closure of clinical sites to students during the Covid19 crisis. No summative marks are allocated to these elements, but they must normally be passed in order to progress to year 2.

As an exceptional adjustment for the 2019-20 academic year only, students will be permitted to progress without completing these components.

Due to ongoing placement restrictions students will need to achieve and demonstrate competencies within their chosen specialty only during the Year 2 Clinical Training blocks. Attendance for CT1 has been assessed as satisfactory, with no additional attendance required.

The module leaders for Clinical Training 2 (CT2) will act as Internal Examiners for the trailing CT1 components according to the normal regulations. The assessment will be ratified by the Year 2 External Examiners and the Year 2 Board of Examiners in July 2021.

YEAR 1: TRAILED MODULE					
Module	Credit	Assessment components	Weighting %	Timing	Achieving a pass
Clinical Training 1:	15	Satisfactory attendance at work- based placements	Pass / Fail	Completion by end of CT2 module (April/May)	Each assessment component must be passed separately in order to achieve an overall pass for this module.
		Satisfactory demonstration of specified Clinical Competencies DOPS/CBD/OCE	Pass / Fail	Completion by end of CT2 module (April/May)	
		Satisfactory demonstration of specified Professional Competencies	Pass / Fail	Completion by end of CT2 module (April/May)	
		Portfolio	Pass / Fail	Completion by end of CT2 module (April/May)	

Weighted Attendance for Cardiac Physiology and Respiratory & Sleep Physiology modules:

The weighted attendance component for the Cardiac Physiology and Respiratory & Sleep Physiology modules will be removed for the 2020/1 academic year only due to delivery of online learning, predominately in an asynchronous manner.

YEAR 2: CARDIAC PHYSIOLOGY AND RESPIRATORY & SLEEP PHYSIOLOGY					
Module	Credit	Assessment components	Weighting %	Timing	Achieving a pass
Cardiac Physiology	30	1 written examination	50%	June	Each assessment component must be passed separately in order to achieve an overall pass for this module.
Or Respiratory and Sleep Physiology		1 written examination	50%	June	

Progression to Year 3:

In addition to the rules of progression stated in the Year 2 Scheme of Assessment, students must successfully complete the trailing module before progressing into year 3.
